Darrell,

Nik and I spoke with you on the additional Side Inlet work and Rip Rap that was needed for the pasture segment of CD46. We received a bid from Sycks Construction and with all the rock needed the cost will go over our \$15,000 threshold to do work.

This project ultimately has 3 things going on currently:

1. Buffer Cost Share Project
  - i. Installed ASI Project in Fall 2019, completed some of the dirt work for culvert and ditch bank in spring 2020 and lastly fencing to keep the cattle out is to be installed in the very near future (which is accelerating this process as the site cannot be grazed as is). Overall cost for this work will be close to \$26,254 but there is \$12,000 in Cost Share reimbursement to cover this project. Which should be fully completed by mid-June 2020.
2. Emergency Bank Repair & ASI on the East Side of Ditch
  - i. Bank has sloughed due to recent rain and current work completed. You gave us the go ahead to get bids and move on this project. After getting bids the whole project exceeds our \$15,000 threshold for work. We requested to fix the slough and install the rock on just this site and to install the Alternative Side Inlet next week. This will help get the fence in soon to return the cattle to the site. The cost for these two project is \$7,390.
3. Rip Rap Culverts and Sensitive Slope Area
  - i. Includes North Crossing and about 100' of rip rap to stop the bank from slough and the South Field culvert. All have sever scouring. These two project will cost \$13,440.

If we need to get on the County Board Agenda, we could fully report this project for approval.

Thanks,

**Michael Schultz** | District Manager
